

DigitalPersona® Pro Workstation 3.5.0 Upgrade Notes

Upgrading Pro Workstation Software To Pro Workstation 3.5.0

IMPORTANT UPGRADE RECOMMENDATIONS

While we strive to ensure safe and trouble-free system upgrades, we cannot guarantee performance in every IT environment. It is therefore strongly recommend that you carefully plan and perform reasonable precautions before any system upgrade:

- Review the Readme.txt file on both the DigitalPersona Pro Workstation CD.
- Review the Administrator Guide and identify potential changes to the system administration settings.
- Perform a lab test of the upgrade that simulates your particular IT environment.
- Incrementally deploy and test your system upgrade
- Prepare a software rollback plan to reverse any potential problems. Note that rollback to a previous release will require un-installation of a later revision of software.

Upgrading Pro Workstation Software To Pro Workstation 3.5.0

To upgrade existing stand alone Pro Workstations (non-networked) to Pro Workstation 3.5.0:

If your current version is one of the following:

Pro Workstation versions 3.4.0, 3.2.2, 3.2.1, 3.2.0

Data Migration Note:

All existing **One Touch Sign-On templates**, **Web site One Touch Internet logon screens** and **Win32 One Touch Internet logon screens** will continue to work after upgrading to Pro Workstation 3.5.0

Software Upgrade Requirements:

1. Install Pro Workstations to 3.5.0 over existing version
2. Deploy additional Pro Workstation 3.5.0

If your current version is one of the following:

Pro Workstation versions 3.1.0, 3.0.2, 3.0.1, 3.0.0, 2.1.4, 2.1.2*, 2.1.1

Data Migration Note:

One Touch Sign-On (OTS) Templates: Existing OTS templates need to be converted to work with Pro Workstation 3.5.0 (see **Converting OTS Templates** at the end of this document.)

Web site One Touch Internet (OTI) logon screens: All existing web site OTI logon screens will continue to work after upgrading to Pro 3.5.0

Win32 OTI Logon screens: All existing Win32 application OTI logon screens setup by end-users need to be converted or recreated after upgrading to Pro 3.5.0 (see **Converting Win32 OTI Logon Screens** at the end of this document)

One Touch Crypto (OTC): This application is not provided in Pro 3.5. All files encrypted with OTC must be unencrypted before uninstalling or upgrading prior versions of Pro Workstation software.

***Pro Workstation 2.1.2:** all existing application logon screens setup by end-users need to be recreated with OTI after upgrading to Pro 3.5.0.

Software Upgrade Requirements:

1. Decrypt any files encrypted with One Touch Crypto
2. Install Pro Workstations to 3.5.0 over existing version
3. Convert any existing OTS templates using the OTS Administration Tool

If your current version is one of the following:

Pro Workstation versions 2.0.1, 2.0.0, 1.0.1, 1.0.0

Data Migration Note:

Cached fingerprint data: Un-installation of Pro Workstation software will remove cached fingerprint data for domain user accounts and fingerprint data for local users. All server data is retained.

One Touch Internet (OTI) Logon Screens: Un-installation of Pro Workstation software will remove all OTI logon screens. Users must recreate each OTI logon screen.

One Touch Crypto (OTC): This application is not provided in Pro 3.5. All files encrypted with OTC must be unencrypted before uninstalling or upgrading prior versions of Pro Workstation software.

Software Upgrade Requirements:

1. Decrypt any files encrypted with One Touch Crypto
2. Uninstall existing Pro Workstation software
3. Install Pro Workstation 3.5.0 software

Please contact Digital Persona Technical Support at techsupport@digitalpersona.com for additional assistance in planning your migration to Pro 3.5.0

Support for previous revisions:

Effective February 2005, readers shipping with DigitalPersona Pro for Active Directory software products require support from:

Pro Server for Active Directory v3.1.0 or higher

and

Pro Workstation for Active Directory v3.2.0 or higher

Customers deploying U.are.U® 4000B model readers into existing Pro Server installations, must first upgrade their Server software to v 3.1.0 or higher and Workstation software to v3.2.0 or higher.

Digital Persona Technical Support is available for the previous two (major/minor) software releases. To be eligible for technical support and to ensure optimal software upgradeability (without un-installation) to future releases, we recommend that all versions of Pro software prior to version 3.4.0 be upgraded.

Upgrading your Pro Installation:

Please contact sales@digitalpersona.com for information & pricing to upgrade your Pro installation.

Maintenance & Support Plans:

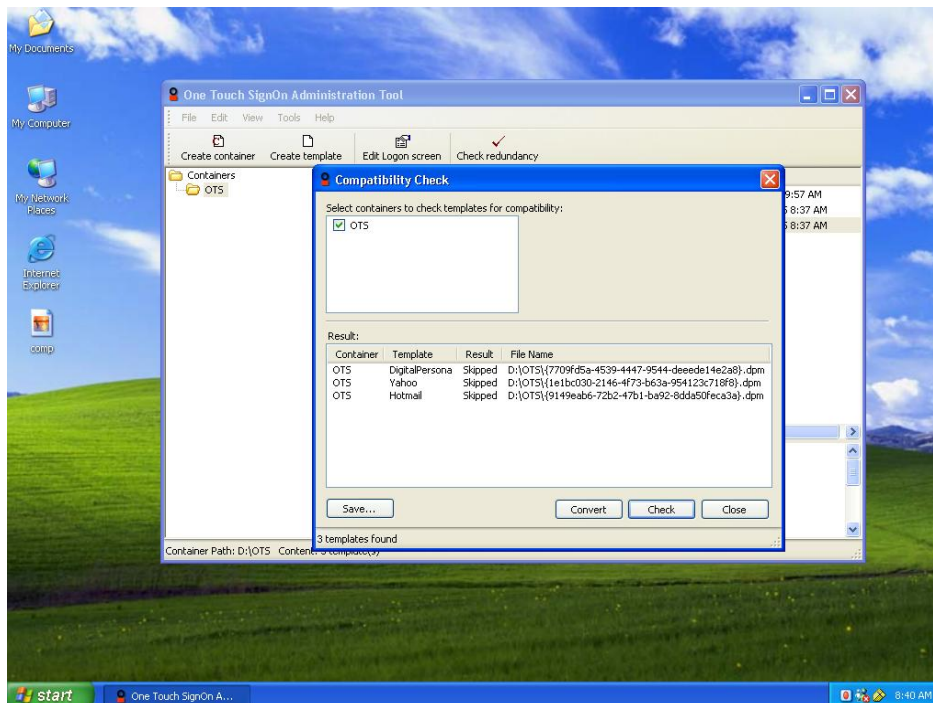

Please contact sales@digitalpersona.com for details and pricing for our Maintenance & Support plans.

Converting OTS Templates

1. Open the OTS Administration Tool.
2. Go to Tools menu and click on Check Compatibility

3. In the Check Compatibility window click on the Save button if you want to keep a backup of your current OTS templates before converting them.
4. Click on the Convert button to convert all OTS templates. The conversion utility will convert the templates and automatically save them in their current location.
5. Click on the Close button to close the Compatibility window.
6. Restart your workstation to automatically download the converted templates to your system.

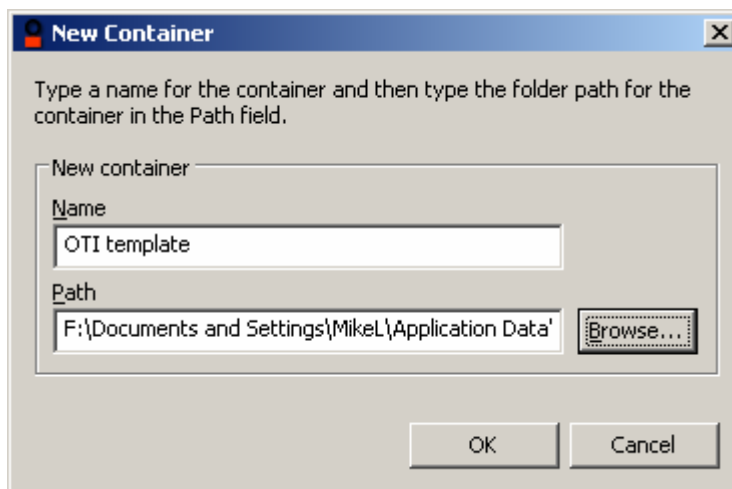

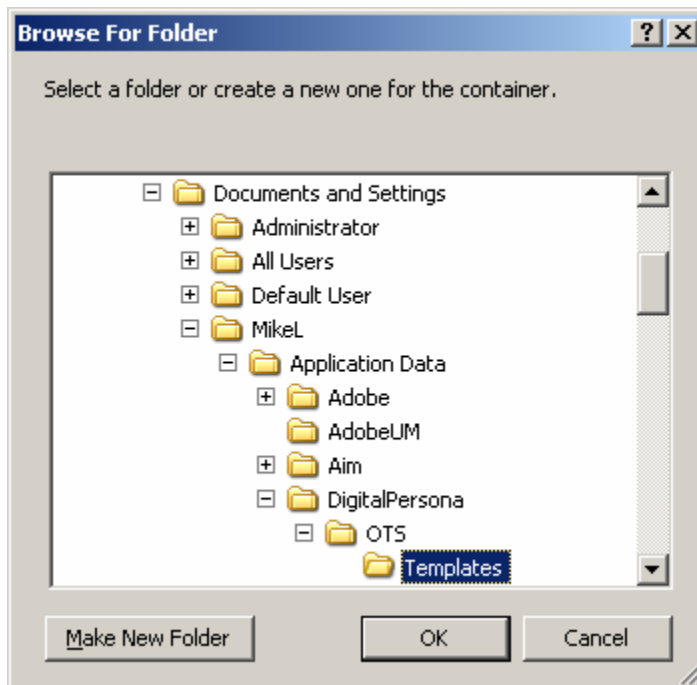

Converting Win32 OTI Logon Screens

1. Install the OTS Administration Tool from the Pro Workstation 3.5.0 CD
2. Start the Tool by going to Start-> DigitalPersona Pro-> OTS Administration Tools
3. Create a new container that contains the path to the location where OTI templates are located. The OTI templates you created are located in a hidden folder in your user profiles folder; this folder is located at:

C:\Documents and Settings\Your Username\Application Data\DigitalPersona\OTS\Templates.

- a. Make sure all folders are not hidden (go to Explorer's Tools->Folder Options)
- b. Create a new container and use the browse button to set the path to YOUR USERNAME location (see screenshots):

4. From the OTS Admin Tools, go to Tools-> Check Compatibility, then select the container that you created in step #3. Click on the "Check" button. The Tool will check for all templates in this container.
5. Click on the "Convert" button; all templates that need to be converted will be converted.

These templates can now be used with Pro 3.5.0; simply go to the Application logon page and login with your registered finger.
